**Re: Opportunity to comment ahead of new Greenpeace International publication**

I am writing to offer you an opportunity to comment in advance of a forthcoming publication by Greenpeace International. Last year fires, most of them reportedly deliberately and illegally lit by ranchers in defiance of regional and federal bans, have destroyed around 30% of Brazil's Pantanal. In its forthcoming report, Greenpeace International will release new data and analysis showing that in 2018 and 2019 your company sourced cattle in the region from properties linked to this potentially illegal destruction or to other reported violations or irregularities.

We ask you to confirm that you received cattle during 2018 and/or 2019 from the suppliers listed in the following table (see below), all of which are directly or indirectly linked to the 2020 fires and/or have irregular CAR status, as shown. Many of them are also subject to IBAMA embargoes or have recently been fined by IBAMA, or else have recently been supplied by ranches that are embargoed, have been fined or have irregular CAR status, again as shown. Please also indicate the most recent date on which you have sourced cattle from these suppliers.

Given that the properties concerned and their owners have in any case been linked to proven or potential illegality, three questions arise:

- what steps you have taken to review suppliers including those that are outside the Amazon
- whether you will continue to source cattle from them
- why you accepted these ranchers as suppliers in the case of those whose links to illegality or policy violations preceded your sourcing

The report also notes evidence that several of the ranches have supplied JBS facilities in Campo Grande from which you in turn have supplied companies in Brazil including Pão de Açúcar (Casino Group), McDonald's and Burger King, as well as exporting beef to markets including Hong Kong, the EU and the USA.

We ask you to confirm evidence indicating that meat is transferred between your two processing facilities in Campo Grande, Mato Grosso do Sul (SIF 1662 and SIF 4400) by means of refrigerated trucks, and that in supply chain terms they must thus effectively be considered as a single unit. Please also confirm that SIF 4400 supplies products directly to McDonald's, Burger King and Pão de Açúcar.

If you dispute in any way the findings presented in this letter, for example if you are no longer linked to, or claim never to have been linked to, any of the ranchers or ranches mentioned, we would welcome your comments, supported by all available evidence.

Also, can you confirm 1. that the 'JBS Green Platform' is intended to monitor only illegal deforestation within the Amazon, and that it will not exclude cattle supplied directly or indirectly by ranches that have engaged in legal deforestation under the Forest Code?

2. that the 'JBS Green Platform' is not intended to monitor fire, including to prepare newly deforested land for pasture, and that it will not exclude cattle supplied directly or indirectly by ranches where fire has been used for land management?

In order to be able to take your response into account when finalising our publication, we would need to receive it no later than the close of business on Thursday, 8 January 2021. Please respond by email also ccing [Romulo.Batista@greenpeace.org](mailto:Romulo.Batista@greenpeace.org) and [Daniela.Montalto@greenpeace.org](mailto:Daniela.Montalto@greenpeace.org)

This action on your part will ensure that Greenpeace International's report can present the most accurate and up-to-date picture of your company's operations, its environmental impacts and its plans to ameliorate these.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'Savio Carvalho', written over a faint circular stamp or watermark.
